Quality Thermoplastic
When You Want It. Where You Want It.

CROWN TECHNOLOGY NOT ONLY OFFERS SUPERIOR PRODUCTS SUCH AS **CROWN COOKIES®** AUDIBLE AND VIBRATORY THERMOPLASTIC PAVEMENT MARKINGS, WE OFFER A SUPERIOR CUSTOMER SERVICE EXPERIENCE. CROWN TECHNOLOGY'S FULL SERVICE TEAM CAN AID YOU WITH:

Selecting proper product based on specification, location, performance, and/or application equipment being used

Arranging shipments around the World

Working with Federal, State, or Local specifying bodies on your behalf to ensure project success

Providing technical product support to ensure proper application and long-term project success

Answering specific questions related to your project to ensure specification and performance guidelines are met

CROWN COOKIES®

Crown Technology manufactures a full array of pavement marking products including audible and vibratory pavement markers. **Crown Cookies®** are manufactured and designed to be installed with Crown Technology's TuffLine® and EcoTherm® thermoplastic pavement marking materials in a unique "one pass" striping system. When applied properly **Crown Cookies®** provide an audible and vibratory warning when driven over preventing lane departures that may lead to traffic accidents and fatalities. A standard ribbon gun and bead dispenser is used in unison with Crown Technology's unique **Crown Cookies®** dispenser that is easily mounted on most striping trucks with little modification. Our products are engineered and manufactured using the latest technology available while also being subjected to vigorous internal Quality Control standards.

COMMON PROPERTIES & BENEFITS

- ◆ One-pass audible & vibratory striping system
- ◆ Identical cure times of standard thermoplastic marking applications
- ◆ Available in white and yellow
- ◆ No additional traffic control
- ◆ Application speeds comparable to standard thermoplastic marking applications
- ◆ Applied along with TuffLine® or EcoTherm® hot-applied thermoplastic material at 100- 125 mils and at standard application material temperatures of 400 - 425°F
- ◆ Provides >90db @ 55mph
- ◆ Excellent color retention and durability
- ◆ Yellow formulated using environmentally friendly lead-free pigment
- ◆ Available in many State/City/County specifications with modifications due to products designed performance and application requirements
- ◆ Some of the many Certifications offered with notable adjustments for the products designed performance:
 - AASHTO M 249
 - EPA 3052, 6010B, or 6010 C
 - ASTM D 6628
 - BS 3262
 - AASHTO T 250
 - ASTM D36
 - ASTM E 313
 - Independent Lab Certification
